**About**

Permissions

Create boards, collaborate with your team.

**Converse with your data and discover insights in seconds**

qbo (pronounced *kju boe*) makes analytics conversational using best-in-class natural language processing, so anyone can use it, from the c-suite to the front lines. Type in a question and qbo surfaces the most relevant answers, visualizations and insights for you in a snap. Actively collaborate with colleagues to dig deeper, make decisions and capture your findings in presentation-ready boards. Empower everyone in your organization to make data-driven decisions. qbo can directly connect to a large range of cloud or on-premise data sources and make insights available directly within Microsoft Teams.

By using qbo, you agree to the [privacy policy](#) and [terms of use](#).

This is an enterprise app that requires a license to use (configuration needs to be done ...)

 Hello Shankar Ramesh. Here are your credentials:

[Show](#)

Today

 qbo 11:29 AM

 **Hello there. Welcome!**

I am qbo, your AI-powered data genie. I love data and nothing delights me more than dishing out data, insights, charts for everyone in the organization. It gets more fun when I am serving a team.

You can collaborate with your colleagues, ask questions, dig deeper together and make decisions. Importantly, I continue to learn with these interaction and I keep getting better with time.

It seems that qbo is not connected to your organization's data yet. We, however, see that you organization does have 1 or more instances of qbo running. You can request an admin to help connect to one of those instances, or if you prefer to simply experience qbo, connected to demo data from Citi Bike NYC, please click on the button below.

- What can I do?
